The latest society fad is the tub cure. In this the patient arises just as the crisp air of the morning is melowed by the first sunbeam. An ordinary wash tub is then filled with hot water and soap suds, into which various articles of linen are thrown. After they are thoroughly saturated the patient takes them up one at a time and rubs them briskly up and down on a washboard placed in the tub. This is kept up until the hands, arms and face are growing pink. The patient then goes into the open air and hangs all the articles of linen on a line stretched for that purpose. The one completing the task first announces the time to the others over the telephone, and is entitled to a prize. It is exciting sport and also invigorating exercise.
